

E-Plan for Emergency Response

Mathew Marshall, Lead Instructor
Cutting Edge Planning and Training, Inc.

SARA Title III

- Information required by the Federal Emergency Planning and Community Right to Know Act, October 17, 1986, also known as Title III of the Superfund Amendments and Reauthorization Act (SARA).

Purpose of EPCRA

- Improve Community Preparedness
- Promote Cooperation
- Increase Public Awareness
- Build Information Database

History of EPCRA

December 4, 1984...
Bhopal, India

- Union Carbide chemical plant
 - Methylisocyanate release
 - 25,000 deaths and more than 100,000 injured

Institute, West Virginia

- Methylisocyanate(?) release
- More than 100 people injured

What Does EPCRA Require?

1. Creation of state and local emergency planning entities.
 - EPCRA § 301(a) – The State Emergency Response Commission “SERC”.
 - EPCRA § 301(b) – SERC establish Planning Districts
 - EPCRA § 301(c) - The Local Emergency Planning Committee “LEPC”.
2. Emergency planning efforts.
 - EPCRA § 303(a) – Emergency Plan
 - EPCRA § 303(b) – Resources
 - EPCRA § 301(c) – Plan provisions
3. Facility involvement and requirements for notification and reporting.

LEPC

- Develops and maintains a local emergency plan.
- Make information and submitted reports publicly available during normal business hours.
- Notify the public of the availability of Title III information, such as the emergency plan, activities, meetings, and provide opportunities for public comment.
- Organize Hazardous Materials Training

Who Makes up the LEPC?

At a minimum the LEPC membership should include representatives from the following:

- Elected state and local officials
- Law enforcement agencies
- Civil defense agencies
- Firefighting personnel
- First aid personnel
- Health care personnel
- Local environmental groups
- Hospital staff
- Transportation personnel
- Broadcast and print media
- Community groups
- Owners and operators of facilities subject to emergency planning

40 CFR Part 370.10

Who must comply with the hazardous chemical reporting requirements?

(a) You must report if OSHA requires your facility to prepare or have available MSDS (SDS) for a hazardous chemical and if either of the following conditions is met:

- (1) An **EHS** is present at your facility at any one time in an amount equal to or greater than **500 pounds** (227 kg—approximately 55 gallons) or TPQ.
- (2) **Non-EHS** is present at your facility at any one time in an amount equal to or greater than **10,000 pounds** (or 4,540 kg).

(b) The threshold level for responding to the following requests is zero.

- (1) If your LEPC requests that you submit an MSDS for a hazardous chemical for which you have not submitted an MSDS to your LEPC; or
- (2) If your LEPC, SERC, or the fire department with jurisdiction over your facility requests that you submit Tier II information.

Section 112(r) of Clean Air Act

- **May 24, 1996, the US EPA Administrator signed the final rule for Risk Management Programs: Accidental Release prevention Requirements**
- **To ensure that facilities handling certain hazardous substances understand the hazards of the chemical and the processes they use, implement the necessary chemical accident prevention steps for the safe operation of their processes, and respond and mitigate the effects of any accidental releases that do occur.**
- **Facilities must document their efforts in a Risk Management Plan (RMP) and share risk and right-to-know information with state and local entities and make it available to the public.**

When every second matters...

- **Designed and developed PRIOR to 9/11/01 through a cooperative agreement between EPA and UTD.**
- **Presents facility and chemical hazards data in a easily accessible format that puts critical information first, is easy to use, and concise.**
- **Search for:**
 - **Individual and grouped facilities**
 - **Facilities in specific geographic area**
 - **Facilities with specific chemicals and/or quantities**
 - **Display facilities with schools and hospitals in Google Maps**
 - **Plume modeling**

Welcome to WebWISER

WISER is a system designed to assist first responders in hazardous material incidents. WISER provides a wide range of information on hazardous substances, including substance identification support, physical characteristics, human health information, and containment and suppression advice. For more information, please see the [WISER home page](#).

WebWISER is best viewed with the following browsers (indicated version or higher): Internet Explorer 7, Firefox 3, Safari 3.2.

WISER is also available as a standalone application for PCs and PDAs. See the [WISER home page](#) for free downloads.

[Substance List](#)

Click here if you **know the name or ID of the substance** that you want to look up

[Help Identify](#)

Click here to have WISER help you **identify an unknown chemical** based on any of the following:

- Physical properties of the substance
- Signs/symptoms from exposure to the substance
- NFPA 704 full or partial placard values
- Substance categories (flammable, meth lab, etc.)
- Transport identification: DOT placard and/or type of rail car or road trailer)

E-Plan - Delivering Vital Hazmat Information to First Responders

E-Plan is - The Nation's Largest Database of Chemical and Facility Hazards Data with almost 400,000 facilities and over 24,000 unique chemicals.

It is free, simple and easy for First Responders and State and Federal users to use.

E-Plan is a proven system that provides First Responder and others with on-site hazardous chemical information for facilities around the United States. It utilizes emergency contact and hazardous material information submitted under the U.S. Environmental Protection Agency (EPA) regulations and sends it via the Internet to First Responders just when they need it the most.

*In hazmat or terrorism disasters,
every second should count.
With E-Plan, every
second does.*
